Dear Ms. Kienitz:

The Public Service Commission staff has completed its analytical review of your 2001 annual report. The primary purpose of the analytical review is to detect possible reporting or accounting related errors, and also to identify significant fluctuations from prior years data that are not sufficiently explained in the annual report. The analytical review identified the following issues:

1. During our review of Account 143 on page F-18 we noted \$809 described as "Hook Up Fees". Please describe this entry further and provide the name of the rate schedule on file at the PSC which authorizes hook up fees.
2. In regard to the utility's problems with high water losses, you reported last year that consultants were being contracted to locate and repair leaks. Please provide responses to the following questions related to this issue. Who was hired, what leaks were found and what repairs were made? What is the status of the utility's meter testing program and what are the results you are finding for percent meter registrations after they have been in use? While your reported loss decreased from extremely high to very high, it still is at a level that is very serious. We will continue monitoring this and working with you until water losses are reduced.

In addition, you may receive additional inquiries from our office regarding your annual report during a rate case, construction authorization, or other Commission reviews.

We appreciate your cooperation in providing the above information. These recommendations are intended to provide accounting assistance and should not be construed as criticisms of utility personnel. If you have any questions, please feel free to contact me by email or by telephone at (608) 267-9198. Please respond within 30 days of this email. If we have no questions regarding your response, you can consider the review closed.
